## Required Minimum Distributions (RMDs) Uniform Lifetime Table

This table is used to determine the required minimum distributions from IRAs and Qualified Plans during the owner's life in situations where the owner's spouse is either not the sole designated beneficiary or is the sole designated beneficiary but is not more than 10 years younger than the owner. (Joint Life Publication 590 if owner's spouse is more than 10 years younger.)

#### Single Life Expectancy Table

This table may be used to determine the minimum amount of withdrawal that is required each year for an individual who inherits money as a designated beneficiary of an IRA. The individual must be specifically named as the beneficiary in order to use the table. If the estate is named, or if no individual(s) is named as the beneficiary of the IRA, the heirs will not be able to stretch out the withdrawals through the use of the single life table.
